1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claim 1-3, 6, 8, 10, 12, 14, 16, 19, and 21, drawn to a method of producing a dehydrated egg product, classified in class 426, subclass 614.
 - II. Claims 4, 5, 7, 9, 11, 13, 15, 17, 18, and 20, drawn to a dehydrated egg product, classified in class 426, subclass 614.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product may be made by a process wherein liquid egg, a particle solid, and water are mixed together (with or without emulsifier) and subsequently drying same by filtration and/or vacuum evaporation.
3. Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.
4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

Art Unit: 1761

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
